
BIG DATA: Diseño y Arquitectura de Soluciones Big Data

Antonio Soto
CEO
asoto@solidq.com

Organización

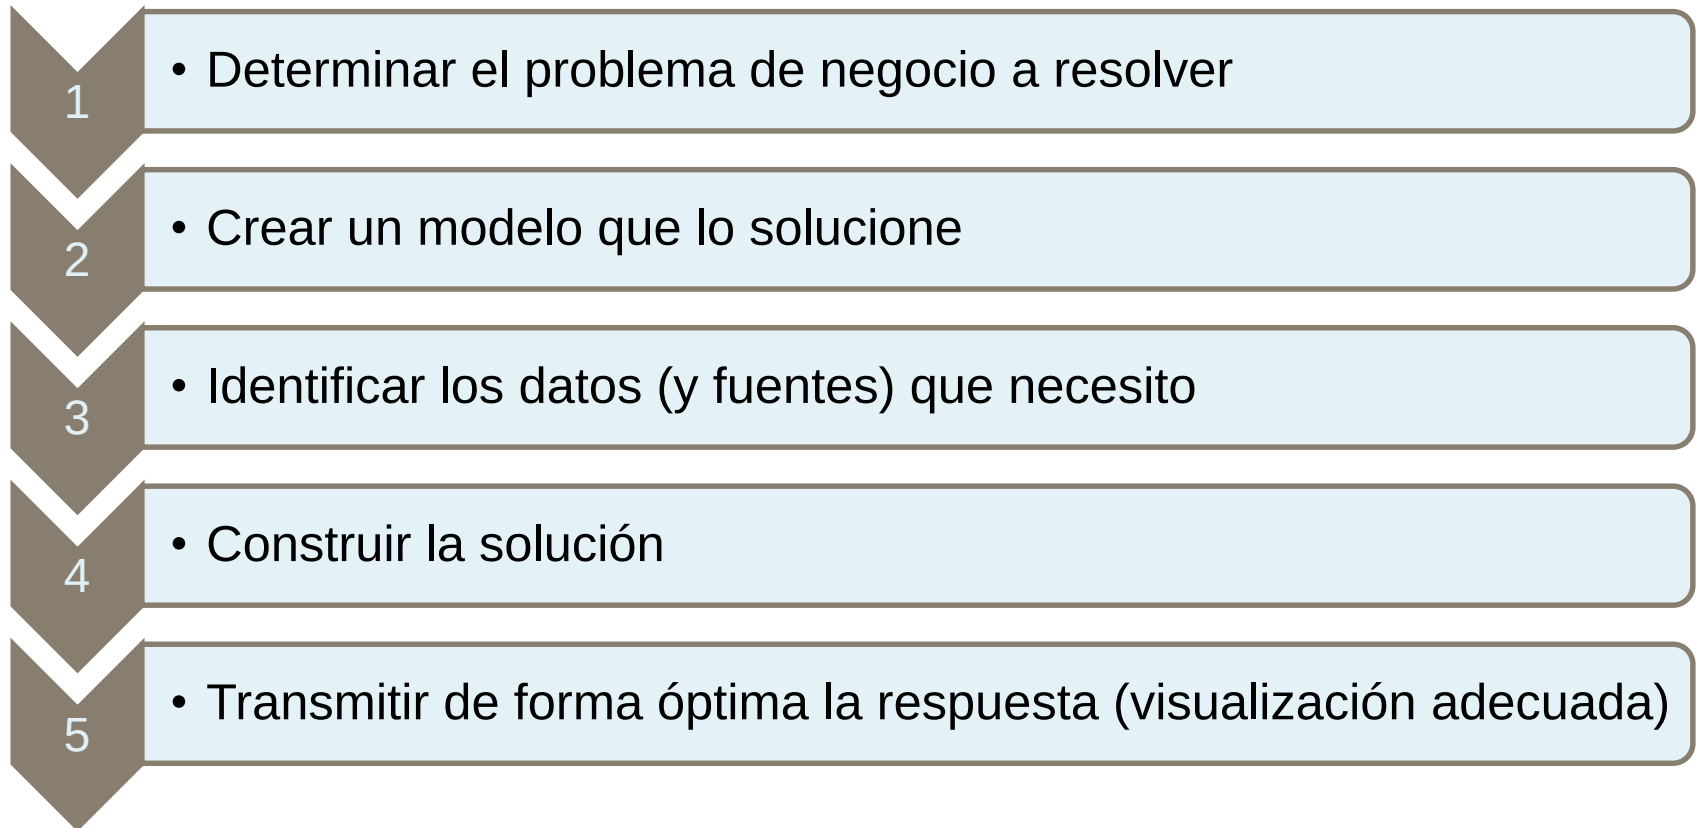

- Objetivos
- Prerrequisitos
- Materiales
- Laboratorios
- Logística

Objetivos

- Conocer las diferentes opciones posibles para definir una Arquitectura Big Data.
- Diferenciar los distintos tipos de requisitos de análisis de información.
- Introducirse en la Analítica Avanzada a través de Spark.

Objetivos

- Responder determinadas preguntas de negocio implica los siguientes pasos:

Prerrequisitos

- Conocimientos de Bases de Datos en general
- Análisis de Información
- Conocimientos básicos de Administración de Sistemas

Materiales

- Material teórico-práctico en PDF
 - Presentaciones PowerPoint
 - Laboratorios

Agenda

- **Introducción a Big Data y Ecosistema Hadoop**
 - Ecosistema Hadoop
 - NoSQL vs. Hadoop
 - Arquitecturas de Referencia
- **Fundamentos de Almacenamiento**
- **Configuración y Administración de Servicios Hadoop**
 - Comprendiendo del Framework de Hadoop
 - Ficheros de Configuración
 - YARN
 - Uso de Ambari para Monitorización y Administración
- **Fundamentos de Hive**
 - Trabajos Hive
 - Estrategias de Join
 - Nuevas arquitecturas HIVE: Stinger / Tez – Impala - LLAP
- **Arquitectura de Apache Spark**
 - ¿Por qué Spark?
 - Casos de Uso
 - Análisis interactivo
 - Spark Streaming
 - Spark ML
 - Modos de Despliegue
 - Ejecución Física
- **Introducción a Databricks**
 - La necesidad de Spark como servicio
 - Arquitectura
 - DBFS

Behind the Cloudera-Hortonworks Merger: 'The Enemy of My Enemy Is My Friend'

NEWS ANALYSIS
MITCH WAGNER,
Executive Editor,
Light Reading
10/8/2018

COMMENT (0)

The merger between Cloudera and Hortonworks, two formerly fierce rivals in big data analytics, will help them compete against even bigger threats from public cloud platforms, such as Amazon and Microsoft, as well as specialized startups.

In the words of the ancient Klingon proverb: "The enemy of my enemy is my friend." [Cloudera Inc.](#) and [Hortonworks](#), both leaders in implementing Hadoop for big data analytics, decided they needed each other to fend off their common competitors.

Cloudera and Hortonworks "went hard and heavy at one another," Mick Hollison, Cloudera chief marketing officer, tells Light Reading. But now they face bigger competition: from the native analytics offerings provided by the big cloud companies including [Amazon Web Services Inc.](#) and [Microsoft Corp.](#) (Nasdaq: MSFT), as well as speciality cloud platforms such as [Databricks](#) and [Snowflake](#).

BIG DATA

OPINION

Cloudera and Hortonworks merger means Hadoop's influence is declining

MATHEW LODGE, ANACONDA @MATHEWLODGE OCTOBER 6, 2018 2:33 PM

On Wednesday, Cloudera and Hortonworks announced a “merger of equals,” where Cloudera is acquiring Hortonworks with stock so that Cloudera shareholders end up with 60 percent of the combined company. The deal signifies that the Hadoop market could no longer sustain two big competitors.
